# Contents of Business

Our main business is selling aftermarket parts within Japan.

We are primary auto parts wholesaler who play an important role as a bridge between manufacturers and retailers.

We purchase high quality/high performance products directly from auto parts manufacturers and supply regional auto parts dealers, rebuilders and secondary auto parts wholesalers.

## We are auto parts specialist.

With a nation-wide purchasing network of our own 7 branch offices located all over Japan, we can provide many different kinds of auto parts (replacement, repair and etc.) particularly for car inspection of Japanese cars such as:

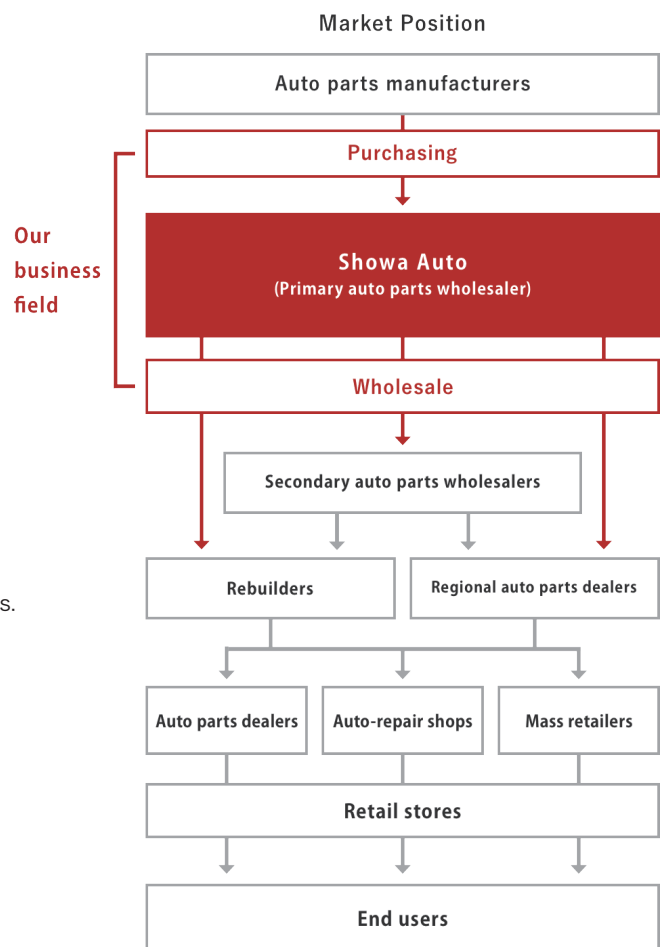

- Suspension parts
- Clutches
- Wiper blades
- Rebuilt parts

As for European/American vehicle parts, we import genuine and aftermarket parts directly from overseas manufacturers /exporters and stock in our Osaka warehouse to distribute to domestic customers.

The number of parts we have is more than 60,000 items.

We have an established reputation about providing parts according to customer needs. Many customers rely on us that our experienced parts professionals can search and find products on demand.

Also, the parts ordering system on the website enables us to take orders immediately for timely delivery.

## Providing a new added value.

The technological development of auto parts has been remarkable and aftermarket business environment is in process of great change.

In order to adapt this new era, we always grasp trends and needs in real time by a thorough marketing to bring a new added value.

We make our effort keeping up with the most up-to-date information on latest product development to offer services quickly and accurately to our customers by using our own distribution channels in Japan and abroad.
